Türka Paper and Packaging has been providing services in the industry for over a decade. Since its establishment, it has been committed to delivering the highest quality service to its customers, using the experience gained in the industry. With a strong focus on environmental awareness, continuous self-improvement, adaptability to current needs, a high level of technological expertise, and a robust team, Türka Paper and Packaging offers its services with the philosophy of producing special products that add value. Türka Paper and Packaging holds the FSC® - CoC (Forest Stewardship Council®) certification, aiming to preserve natural forests and prevent the disruption of forest life and ecosystems. It also pledges to be respectful of the environment, nature, and animal rights.

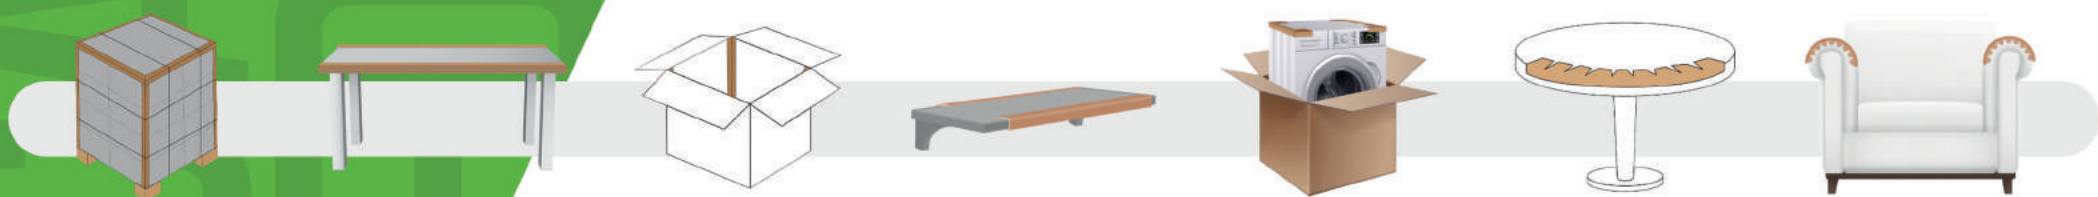

## Cardboard Edge Guard

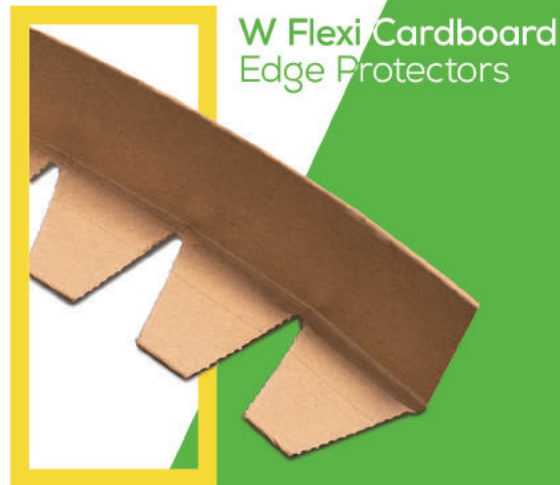

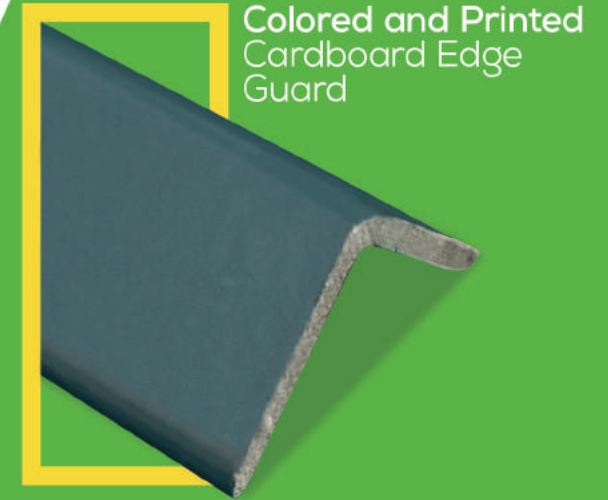

The primary factor that preserves the value of products is packaging. Standard cardboard corner protectors are durable, weather-resistant, angled, laminated solid-looking cardboard strips. They are added to the edges of palletized loads as protective equipment to increase load rigidity and stabilization. Standard Cardboard Corner Protectors provide complete protection against all possible impacts that may occur during transportation and shipping. There is no standard size; they can be manufactured in custom dimensions according to demand. Cardboard Corner Protectors made from recycled paper obtained from waste paper recycling are 100% recyclable, preserving nature while protecting your products.

A (mm)	B1 (mm)	B2 (mm)	B2 (mm)	Tolerance
50-6000	25 - 45	25 - 45	2 - 7	-/+5%
50-6000	50 - 100	50 - 100	2 - 10	-/+5%

### Usage Areas

CARDBOARD

## Cardboard

Cardboard is used in the production of various products in many industries. In the furniture sector, cardboard is extensively used for items like sofas, bases, and chairs. In the stationery sector, it is used for making book covers, folders, files, and luxury boxes. In the packaging industry, chocolate and Turkish delight boxes are produced with different styles of lamination on gray cardboard. The standard dimensions for cardboard are 70x100cm and 100x230 cm. Production is available in thicknesses ranging from 1 mm to 4 mm. Custom dimensions are also produced upon request.

## Paper Tupe

It is produced from 100% recycled paper. It is used for wrapping, packaging, and transporting flat materials such as packaging and cleaning papers, fabric, leather, cardboard, nylon, stretch films, aluminum foil, and more. Its cylindrical structure is also used for the protection and transport of various products such as gifts, diploma scrolls, and map films.

## Honeycomb Panel

Honeycomb panels are obtained by combining 100% recyclable papers through a special technique. Due to their ecological composition, recyclability, lightweight structure, and economic price, they are used for various purposes in many fields. When arranged on a pallet, they prevent boxes, bags, and similar products from slipping and deforming. When used as separators, they ensure the stability of your pallet. They facilitate the transport of yarn coils in the textile industry. They provide strong protection against external impacts on your products. They are produced in different sizes and dimensions.
